

THE QUARTERLY REPORT OF THE UFO RESEARCHERS OF FINLAND: 1/74

During the first three months in the year 1974 The Ufo Researchers of Finland received reports about a total of 34 Finnish cases, which were possible or obviously related to ufo phenomena. Over half of them (20) did take place before year 1974. During January - March did only 14 cases (6 + 3 + 5) , even, of great part of them were only diffuse light phenomena. Though in the older there are some interesting cases, of which even two are examined throughly (esp. the case of Murtoselkä).

From Finnish news media in January - March, the researchers have found over 50 news and articles which dealt with or were related to ufos. Of these the great part (38) have been in newspapers and local papers. 16 writings of ufos have been found in weekly journals. Estimating real numbers of ufo cases is quite impossible. We can only say that most of the cases don't get publicity. In this stage The Ufo Researchers of Finland not even know all items and articles of which might come to newspapers. In spite of deficiency the information that given by The Ufo Researchers of Finland are, at least, giving instruction.

REPORT PERIOD 1.1.1974 - 31.3.1974.

CASES:

January

1. 11.1. Nivala, 9.20 p.m., 2. A very bright, red-colour, light-ball (2 - 3 meter diam.) flying low and slowly.
2. 21.1 Parish of Helsinki, 8.00 p.m., 2. Two bluish, flat-shaped, lights were shaking for a few seconds over a field.
3. 22.1. Kokkola, 5.35 p.m., 3. A bright light phenomena coming from the South, stoped and got down, separated into two ball-like pieces.
4. 22.1. Helsinki and it's nearest surroundings, 6.00 - 7.00 p.m. Five observations from different places and time. Three formation and two solo flights.
5. 23.1. Kannus, 8.45 - 10.05 a.m., 3. A grey light standing at the sky. Later on, it moved solwly and looked brighter.
6. 23.1. Nurmijärvi, 8.57 - 9.08 a.m., 3. A moving light-stripe maked a curve once in a while.

February

7. 1.2. Nivala, 1.30 a.m., many. A very bright, red-colour light-ball moved in the sky. Observation time over a half a minute.

February

8. 9.2. Turku, 10.40 p.m, 1. A glowing, pink-colour, light standing still, about a minute, in the sky. Then it moved upward to one side and disappeared.
9. 15.2. Nurmijärvi, 9.15 p.m. A buss-driver found a black spot in a crust of snow, which was about 5 meter diameter, of which snow was melted and pressed down about 20 cm off a normal level.

March

10. 2.3. Kokkola, 6.00 a.m., many. A very bright light phenomena moving toward the ground, below a cloud. Observation time under 2 seconds.
11. 10.3. Karhula and Loviisa, 5.15 - 6.30 p.m., many. On the western sky, bright light-stripe, from which alighted light-beams, of which broke away a ball-shaped object. (Also photographed.)
12. 13.3. Mikkeli and Kuopio, 8.15 p.m., many. Two yellow ball-shaped light moving on the northern sky. The light was observed, also, from an aeroplane.
13. 25.3. Nurmijärvi, 8.00 - 9.10 p.m., many. Several observations of a light-ball flying low altitudes and changing speed.
14. 25.3. Vantaa, 8.55 - 9.10 p.m., 1. At first there was a thing like a crescent moon in the sky. Later on, yellow light-ball moving toward the North very slowly.

OLDER CASES:

Case before year 1974 have through reports got know 20.
In the next short presentation of two examined cases.

15. 31.12.1772, Village of Pulkkinen in Veteli, 7.10 - 7.20 p.m.

Miss Riitta Kalho (21) and Miss Sirkka Pulkkinen (22) left their summer-cottage in spite of hitch-hiking for new year dans. Walking a little bit miss Kalho observed in the sky red flashing - bigger than the Moon. After it, the girls observed a red light, of the size of a tennis-ball, which move silent in a hight of two meters. The light got forward fast and it died out many times for a few seconds. When a car drew on the road the light got out of sight.

The girls walked hand in hand, but suddenly, miss Kalho was thrown by unknown force about three meters. Then she saw some meters away a black vague-shaped of about two meters, who was about a meter off the surface of the road. Near the top of the shape they observed a light of the size of an egg.

Miss Kalho felt as she got in the force of a force-field. She could get a voice, she didn't hear anything and she difficulties in breathing. Within a few seconds she managed to get her self from this power. After that she went screaming for help to the nearest house.

Also Miss Pulkkinen saw that red light, which soon moved to her. It came below her right shoulder when miss Pulkkinen went after miss Kalho to the house. The light caused stirring and heating in the back and in it's force-field world seemed desert, strange, soundless and moving was difficult. When they, at last, got through syren-fence of the house miss Pulkkinen did get from the force of the light-ball. The both girls got saved in the house. Their clothes were covered by mud. Miss Kalho had dropped her shoe and her feets were black and blue.

OLDER CASES:

16. 28.12.1973, Oulu, Murtoselkä, 9.40 - 11.33 p.m., 5.

Five soldier observed during their guard duty three different observing of a strange light, which moved in the guar-area.

The observations did take place between 9.40 - 9.43 p.m (one soldier was within 100 meters from the white and red lighting ufo), 10.10 - 10.12 p.m. (two soldier observed in the guard yard an ufo, lighting white and red light, flying), and 11.30 - 11.33 p.m. (two soldier saw a red-white ufo flying away).

The case was been examined by boot the Army and The North-Finland Uforesearch.
